

Matteo Piovella, MD, is an internationally acclaimed cataract and refractive surgery expert and has a private practice at Global Center for Ophthalmology in Monza (Milan), Italy.

Dr Piovella is the President of the Italian Ophthalmological Society - SOI, (2010/2023) an institution that represents the 7000 Italian eye doctors. He is the recipient of the highest international awards for cataract and refractive surgery.

Dr Piovella has been sharing his experience with eye doctors worldwide, having taught in 274 Instruction Course Programs held during various esteemed international meetings.

Through these meetings, he has performed 148 live surgery demonstrations to share his knowledge and innovative techniques. His scientific studies have generated 809 scientific paper presentations. He served for 6 years as Associate Medical Editor of Ocular Surgery News, a leading trade journal that circulates through more than 50.000 ophthalmologists worldwide.

His major interest is spreading Refractive Cataract Surgery in the world. In 2022, 99% of his cataract patients underwent surgery with Trifocal IOL implantation. He identified the essential role of advance biometry in achieving the perfect correction of visual defects after cataract surgery and formulated indications to treat Dry Eye and MGD to be applied to all refractive cataract surgery patient candidates.
